The Foundation

CVISNET is a Non-Governmental Organization (NGO) founded to develop a useful standard of ICT solutions to government, non-government and the private sector in Region 7.

Conceptualized as an internetworking project jointly collaborated by the Regional Development Council (RDC) and the Department of Science and Technology (DOST-7), it is considered the first of its kind in the country. CVISNET facilitates information sharing through the exclusive network that interconnects all government agencies and non-government organizations in Central Visayas into one common hub through the Internet.

Since its formal operation in September 1998, CVISNET has maintained a track record in providing efficient ICT solutions to members composed of government, non-government and private organizations.

Awards Received:

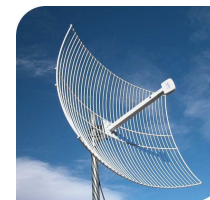

- 2005 ADOC Award For the Best e-Practices
